PROFESSIONAL SUMMARY

Backend developer working with Node.js and Python, with advanced Java knowledge and familiarity with Spring Boot. Strong foundation in data structures, algorithms, and scalable API development.

WORK EXPERIENCE

Knowledge Excel Pvt Ltd

Mar 2026 – Present

Backend Developer Trainee

Delhi

- Built scalable backend services using **Node.js, Express.js, and Python (FastAPI)** and developed modular **RESTful APIs** for core product features.
- Designed **5+ production-ready API endpoints** for authentication, data processing, and service communication.
- Integrated backend services with **SQL/NoSQL databases**, optimizing queries and improving query performance.
- Developed services handling **concurrent requests**, improving microservice reliability under load.
- Debugged and optimized backend modules, reducing **API response time by 15%** and improving system stability.
- Collaborated with **4+ developers** using **Git workflows** (PRs, branching, code reviews).

Webapphealing Technology Pvt. Ltd.

Dec 2025 – Feb 2026

Backend Developer Intern (Project Internship)

Noida

- Developed backend APIs using **Node.js and Express.js** for application service integration.
- Implemented secure **JWT-based authentication** and **RBAC authorization** to protect sensitive API endpoints.
- Built modular **validation and service layers**, improving maintainability and reducing integration defects.
- Optimized request lifecycle and middleware flow, reducing **API error rates** and improving response consistency under concurrent load.
- Implemented **centralized error handling and structured logging** to improve debugging and observability.

PROJECTS

Smart Food Waste Reduction Platform

Live | GitHub

Node.js, Express, MongoDB, Redis, React

- Built donation platform for **donors, NGOs, and admins** using **JWT authentication** and role-based control.
- Developed services with **Node.js, Express, MongoDB** and **geospatial queries** to match NGOs with donations.
- Implemented **real-time using Socket.io** for donation broadcasts, pickup tracking, and notifications.
- Designed **matching algorithm** using distance, urgency, reliability, and capacity to optimize NGO assignment.

EchoSphere — Real-Time Chat Application

Live | GitHub

Node.js, Express, MongoDB, Socket.io, React, TypeScript

- Built a **real-time chat platform** using **Node.js, Express, MongoDB, and Socket.io** for low-latency messaging.
- Implemented authentication with **JWT access/refresh tokens** and **OAuth (Google, GitHub)** using Passport.js.
- Designed backend with **REST APIs, WebSocket, and validation using Zod** for reliability and safety.
- Deployed using **Vercel (frontend) and Render (backend)** with rate limiting, CORS, and validation.

COMPETITIVE PROGRAMMING

- **LeetCode**: 170+ problems — Contest Rating: 1541 Profile
- **GeeksforGeeks**: 120+ problems — Coding Score: 310 Profile
- **HackerRank**: Problem Solving (Intermediate), Python (Basic) Profile

SKILLS

Programming: JavaScript (Node.js), Python, Java

Backend Development: Express.js, FastAPI, REST APIs, Authentication & Authorization, API Integration

Databases: MongoDB, MySQL, PostgreSQL, SQL, NoSQL, Database Design

System Design: Microservices Architecture, Web Application Architecture, Object-Oriented Programming (OOP)

Cloud & DevOps: Docker, AWS, CI/CD, Git, GitHub, Linux

Concepts: Asynchronous Programming, Performance Optimization, Networking Fundamentals

EDUCATION

Dr. A.P.J. Abdul Kalam Technical University

Expected: May 2026

B.Tech, Computer Science and Engineering(CSE)

Grade: 7.7
